

The pumpkin patch!

the life of a pumpkin... 

Out in the patch
the pumpkins grow -
They're also known
as squash, you know!
A seed, a vine, a flower
and bees - to pollinate
if you please!
We watch -
We wait -
and in the fall,
a giant, hollow, orange ball.

 Buzz around the pumpkin flowers.
Pollinate for hours and hours!

Solve the math problems in each pumpkin. Use the letter next to your answer to fill in the missing letters in the word boxes.
HINT: You'll find some of the words in the poem!
